

INTERFACE INSTRUCTOR SEMINAR

Presented by the Technology Innovations Advisory Committee

The University of Florida Technology Innovations Advisory Committee (TIAC) invites all UF instructors (faculty, lecturers, teaching assistants with their own classes) for the year's second **Interface** seminar Thursday, December 8th from 10AM to 3:30PM. A free lunch will be provided; however, seating is limited and registration (no fee) is required. All instructors attending this year's **Interface** face-to-face program will be entered in a drawing to win a free iPad.

The **Interface** program is designed to engage UF instructors in demonstrations, discussion and networking focused on improving teaching and learning by deploying innovative pedagogy using new and emerging technologies. It will feature a series of "lightning rounds"—short demonstrations of technology use and instructional practices. **Interface** participants will have opportunities for discussion with both presenters and peers.

The program culminates with a keynote presentation by Dr. Sanda Erdelez, a noted expert in the fields of Human Information Behavior and Usability and the Web. She is also the founding director of the Information Experience Laboratory at the University of Missouri—a state-of-the-art laboratory for conducting usability studies.

Interface is intended as a face-to-face forum; however, the lightning rounds and keynote will be live streamed. Register as an Online Participant to receive the appropriate URLs.

Interface is sponsored by the Technology Innovations Advisory Committee, the Office of Academic Technology, and the UF College of Journalism and Communications.

ABOUT TIAC

The UF Technology Innovations Advisory Committee was created by the Director of the UF Office of Academic Technology to:

- Identify emerging technologies relevant to the academic mission of the University
- Assess and recommend for analysis specific emerging technologies that improve the quality of learning and/or reduce the cost of instruction
- Analyze the feasibility for implementation at UF of promising emerging technologies
- Recommend adoption strategies for feasible emerging technologies
- Encourage UF instructors to enhance the use of technology and innovative pedagogy to improve teaching and learning
