

# What is VIVO?

- Research and Scholarship Discovery Across the University of Florida
  - A service of the Clinical and Translational Science Institute
- A Grant
  - \$12.3M 2-year ARRA/NCRR to seven schools – UF (lead), Cornell, Indiana, Washington University, Weill Cornell Medical College, Scripps Research Institute, Ponce Medical School
- A Community
  - Rapidly growing group of collaborators, adopter, agencies around the country and world implementing VIVO for research and scholarship discovery
- Work in Progress
  - Development, implementation, outreach

# Research and Scholarship Discovery

- Provide linked information about research and scholarship: people, papers, grants, organizations, resources, studies, creative works, datasets
  - Searchable
  - Authoritative
  - Linked
  - Open
  - Reusable
  - Visualized

# VIVO at UF

- VIVO at UF currently contains 6,928 faculty, 18,427 grants, 8,752 organizations, 66,825 course sections and 12,553 publications. Grants are linked to people, organizations. Full navigation.
- Linked data – An organization lists its grants and investigators. An investigator lists grants and organizations. A grant lists its organizations and investigators.
- Example: UF Department of Chemistry page lists 327 awards, each linked to faculty involved

## A demonstration of multi-institutional search

A group of eight top research institutions dedicated to facilitating global research efforts recognize the challenges faced by researchers in uncovering parallel and related efforts, and have decided to join forces in standardizing the way institutional data gets published. Each institution uses the VIVO software to manage and publish up-to-date information about researchers and their activities.

This website provides a working example of how a multi-institutional search functions, allowing you to search across all seven partner institutions and across all disciplines to find people and information that could dramatically impact your work.

# VIVO Searchlight

A convenient way to find researchers

Searchlight is a small app that automatically shows you VIVO profiles related to the page you're reading.

Dr. Kristin Baldwin studies the roles of small GTPases in regulating the neural circuitry of the mouse olfactory system and uses a novel system for visualizing the neural circuitry of the mouse olfactory system. She is currently investigating the neural circuitry of the mouse olfactory system and uses a novel system for visualizing the neural circuitry of the mouse olfactory system.
