Slide 1

NUR3816 which is an RN-BSN course (this is a 5 semester part-time program). Second cohort of students. Three faculty in Nursing are using ePortfolios. The ePortfolio is used to showcase professional practice along with academic work.

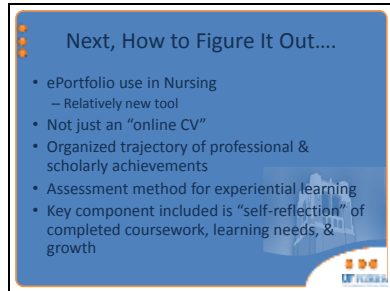

Slide 2

- For a variety of good reasons, the College re-activated the RN-BSN program in an all online format, bringing with it, its' own challenges
- One of which was how would we facilitate articulation from 2 year programs into the baccalaureate degree
- FDOE permits Associate degree nurses can earn and be awarded 26-30 upper division credits by one of three options
 - Challenge Exams
 - Escrow Credit
 - Portfolio Review --- Which is the one that made the most sense to us
- Challenge exams seemed punitive, just awarding the credit by escrow seemed to lack any rigor to us, so a Portfolio, or rather an electronic portfolio was a great solution made complete sense to us

Slide 3

- So our next step was figuring out how to do this ePortfolio in our program...
- Knew we needed a format or tool that we could use that shows evidence of professional growth of experiential learning over time, as well as including professional course work
- It also needed to be able to flow across several courses in the curriculum
- Of course, we hopped over to the literature and found articles in several disciplines including health professions.
- In nursing the literature was scattered, but it was evident that the use of multiple aspects of learning over time combined with the use of self-reflection of experiences was most important aspect

Slide 4

- We developed the purpose and objectives for the ePortfolio
- THE PURPOSE of the ePortfolio was to document evidence that all BSN program objectives have been met
- From that purpose, 3 objectives for the ePortfolio were developed
 - Meet the course objectives
 - BSN Program Outcomes
 - Meet AACN or our accreditation professional standards

Slide 5

- Then had to figure out two important pieces of this process, what goes into the ePortfolio and how do we evaluate
- The easy part for us was determining what components to include in each ePortfolio
 - This was much easier for us as we knew what we wanted to include and what it should look like
 - Contain evidence shows mastery of the program outcomes and professional standards
- Then we had to determine how to assess or review the ePortfolio?
- This was the harder piece!
- Selected format that incorporated both technical criteria as well as reflecting the program outcomes
- One thing we learned in CON was how important it is to figure out this assessment process first
- We were little slower in finalizing the assessment tool to be used in the 5th semester of our program
- Students should also be provided the guidelines in the beginning

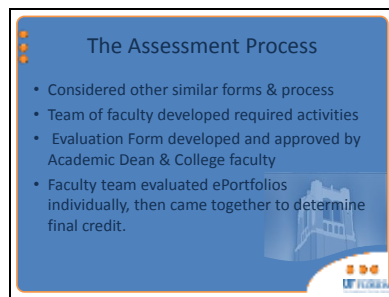

ePortfolios with Sharon Bradley

Slide 6

- The RN-BSN program is 5 semesters, part-time, because they are working nurses
- The development of the ePortfolio is specifically placed in 3 semesters across three courses and culminates in a final semester Assessment Review for the Portfolio credit award.
- This slide provides a snapshot of how we implemented the ePortfolio and what the major tasks were in these 3 semesters

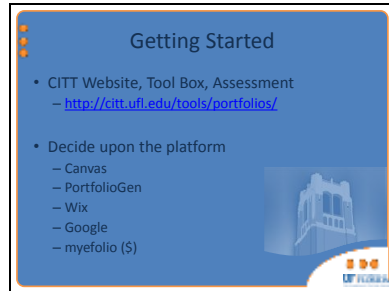

Slide 7

- Having a small team of faculty to establish the ePortfolio activities across the program is important
- We reviewed how others were completing this process
- Then we selected the components we would use to assess or evaluate their final product
- Also had to develop a point or a weight system
- The final assessment process was done by 3 faculty members, who were all instructors for the corresponding courses with ePortfolio components
- Did them individually, then we met together to discuss and determine final credit.
- Gave us interrater reliability, also made suggested revisions to the assessment form for the future

Slide 8

- One resource available that is new is the ePortfolio page on the CITT website
- It provides an Overview, Things to get started – some I have mentioned
- It also has some other helpful resources that would be very useful when getting started
- One thing I want to mention here is that we have used the Canvas ePortfolio platform, as that was the only one available when we developed this
- And Canvas does have helpful resources that assist the students in getting started
- But I see some other platforms mentioned on the CITT site that I have also listed here
- I like the look of one or two of them, but am not sure how readily available they are to us
- There are also some platforms that cost either the school to adopt or would cost the student

Slide 9

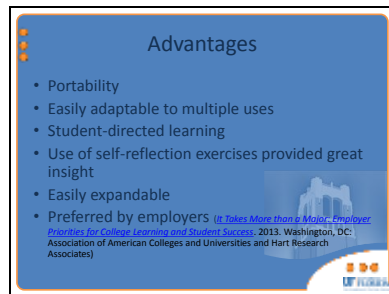

- Students really liked ePortfolios
- But they need clear instructions
- I created a “sample” ePortfolio to share with them so they could see how it should look
- But they can put their own touch or unique spin on theirs
- Having faculty teams is really important. You can’t do this across courses or a program without having a team. Certainly could do in one individual course, but I would

ePortfolios with Sharon Bradley

question that value of the product to a student, especially if they put a lot of work into it

Slide 10

- Easily able to be mobile or portable, simply share your ePortfolio link with instructors, potential employers, or to showcase your work.
- Easily change the type of ePortfolio
 - For example, we envision our students being able to easily modify theirs for potential employers, which can set them apart from their peers and help with securing high demand job
- Students are in charge of their ePortfolio and reflect their personality while maintaining professional image
- The reflection essays were extremely beneficial to the students and to the faculty. They show tremendous insight and role development

Slide 11

Challenges

- Canvas has limited ability to change layouts or add creative features
- Canvas ePortfolio layout can be confusing to students
- Evaluation /assessment
- Consistency of use
- Access/Transferability

The slide features a blue background with a white outline of a building and the UFL logo in the bottom right corner.

- Canvas platform was limiting
- Some aspects were confusing
- Development of the assessment tool took great deal of time
- Need to have buy-in with your academic leaders and faculty using it to ensure it is consistent in its use
- Not known how long a student will have access to Canvas, nor how available the link will be to those outside of UFL domain?

Slide 12

Student Example

- From Fall 2015
- Whitney Barrs ePortfolio
 - <https://ufl.instructure.com/eportfolios/6659?verifier=kX6sQnjxcruBukqng51onSoUAnUU2NKUaiYYkAA>

The slide features a blue background with a white outline of a building and the UFL logo in the bottom right corner.

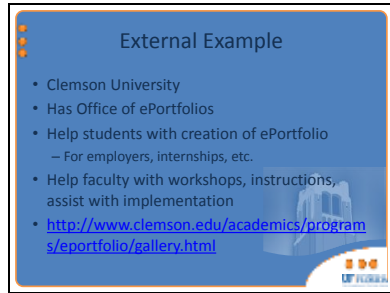

Slide 13

The screenshot shows a complex interface with a table of assessment items. The table has columns for 'Item Name', 'Weight', 'Status', and 'Score'. The items listed include 'Self-reflection on the work', 'Peer-review of the work', 'Faculty review of the work', 'Self-reflection on the process', 'Peer-review of the process', 'Faculty review of the process', 'Self-reflection on the overall experience', 'Peer-review of the overall experience', and 'Faculty review of the overall experience'. The scores for each item are listed in the 'Score' column.

Item Name	Weight	Status	Score
Self-reflection on the work	1.0000	Completed	100%
Peer-review of the work	1.0000	Completed	100%
Faculty review of the work	1.0000	Completed	100%
Self-reflection on the process	1.0000	Completed	100%
Peer-review of the process	1.0000	Completed	100%
Faculty review of the process	1.0000	Completed	100%
Self-reflection on the overall experience	1.0000	Completed	100%
Peer-review of the overall experience	1.0000	Completed	100%
Faculty review of the overall experience	1.0000	Completed	100%

External Example

- Clemson University
- Has Office of ePortfolios
- Help students with creation of ePortfolio
 - For employers, internships, etc.
- Help faculty with workshops, instructions, assist with implementation
- <http://www.clemson.edu/academics/programs/eportfolio/gallery.html>

The slide features a blue background with a faint image of a building. In the top left corner, there are three orange dots. In the bottom right corner, there is a logo for the University of Florida.

Slide 15

External Example

- Auburn University
 - Office of University Writing oversees ePortfolios
 - University wide initiative
 - Examples at <http://wp.auburn.edu/writing/eportfolio-project/eportfolio-examples/>

The slide features a blue background with a faint image of a building. In the top left corner, there are three orange dots. In the bottom right corner, there is a logo for the University of Florida.
