

Affordable Access Innovation and Design Award

I. Narrative

Describe the nominee's contributions to supporting open education by creating and developing open educational resources (OER). If the contribution has been used by the wider educational community, describe the audience and impact. If the contributions have been used in UF courses, describe which courses. Provide estimations of cost savings if applicable and available.

II. Supporting Documentation

Provide links to the OER materials. If materials have been uploaded to multiple repositories, only one link is needed but list which repositories have been used to distribute the OER.

Provide supporting evidence or documentation regarding the number of students and how cost savings were calculated if applicable.

Affordable Access Advocacy and Adoption Award

I. Narrative

II. Supporting Documentation

For recognition related to adopting OER, provide links to the OER materials that were developed and provide screenshots or other artifacts of how they were integrated into the course.

For recognition related to advocating for OER, provide links to any workshop materials developed or materials relating to OER initiatives (i.e. flyers or agenda items).

Supporting documentation can be provided for either adopting or advocating OER or for both. Provide supporting evidence or documentation regarding the number of students and how cost savings were calculated if applicable.
